CreaKids (LV, Preschool)

Kontaktperson: Kajina, Daina (daina@creakids.lv)

## Andre partnere:

Laeringsverkstedet Preschool (NO, Preschool)

Reykjakot kindergarten (IS, Preschool)

## Søknadssammendrag

Responsible lifestyle and ecological environment have recently become especially important for people and have attracted heightened public attention. Teaching responsibility for one's actions, lifestyle and environmental protection to children is of utmost importance. A significant role is played not only by family and family traditions and habits, but also by the institution where children spend most of their time.

To achieve this, it is necessary to develop an educational programme which would engage the family, providing assistance and methods outside the educational institution in order to maintain the education and opinions regarding responsible lifestyle obtained in the institution.

Over goals of the Project are:

- development of quality and innovation in the educational systems for lifelong learning;
- strengthening and developing cooperation among the schools (including kindergarten/pre-school);
- promoting the development of quality, creativity and innovation in education.

Aims of the Project are:

- develop innovative education tool for pre-schools (teacher, parents, children) for sharing best practice, provide access to methodology and ensure lifelong learning;
- develop methodology for responsible lifestyle integration in the education system with the goal to reach as high level of the offered service as possible

Within the framework of the project it is planned to develop a training course and informative materials not only for the improvement of the education system itself, but also to develop an educational platform for parents, where they will be able to educate themselves on their own or joining in groups on responsible lifestyle aspects

and their inclusion in the daily life of their family, as well as to receive information on the methods and activities that the education institution includes in their programs with children.

Our innovative aspect will be point to two parts: methodology and education provision during outdoor activities and methodology and development of services providing responsible lifestyle.

Within the framework of the project the cooperation among the partner country pre-school institutions will be promoted and strengthened, the good practice exchange will take place, and the contacts for similar goal reaching in each country will be strengthened.
